The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).				
Status

η

#### **DETAILED ACTION**

## Allowable Subject Matter

- 1. Claims 3-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 2. The following is a statement of reasons for the indication of allowable subject matter: None of the cited prior art disclose or teach a control means with a detector means suitable for extracting from a signal that is proportionate to the current that flows through the converter a rectified sinusoidal component with a period that is the same as half the period of the period of the network voltage a second current generator coupled with the first generator and further control means which have at the input the rectified sinusoidal component and are capable of commanding the second current generator so as to decrease the value of the load current of the capacitor at the instants of time wherein the alternating network voltage takes on the value zero.

#### Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### Specification

4. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The

amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

The disclosure is objected to because of the following informalities: The related
 U.S. Patent Application Serial No. is missing in the cross-reference section on page 1.
 Appropriate correction is required.

## **Drawings**

6. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Objections

7. Claim 12 recites the limitation "a comparator" in line 6. There is insufficient antecedent basis for this limitation in the claim. Since Applicant has already claimed a

first comparator the second comparator need to be claims as —a second comparator—. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 9. Claims 1, 2, and 10-22 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art.

Applicants admitted prior art Fig. 1 disclose the claimed invention.

With respect to claims 1, 2 and 10,

A converter 20, a control device 1, an alternating input voltage Vin, a power transistor M, output terminal Vout, a pilot circuit 3, 4 and 6, control means 1, control means 12, error amplifier 3, first signal Vr, reference signal Vref, means for generating a ramp voltage signal SW, capacitor C, a first current generator of a current signal Ic, and error signal Se, comparator 5.

Art Unit: 2838

With respect to Claims 11-18,

A Boost converter **20**, a controller **1**, an error circuit **3**, a distortion reducing circuit **6**, a first comparator **3**, a multiplier **4**, a capacitor **C**, a power transistor **M**, current source **Ic**, a means for generating a ramp voltage signal SW, and a comparator **5**.

With respect to claims 19-22,

Regulating the output signal 1, lengthening the on period 6, generating a error signal 3, generating a comparison product by multiplying the error signal 4, comparing the comparison product 5, first signal Vr, reference signal Vref, second signal Vi, error signal Se, third signal Sm, fourth signal Srs and the comparison signal is the output from the comparator 5.

# Double Patenting

10. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

11. Claims 1, 11, 17 and 18 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 15, 20 and 22 of copending Application No. 10/633,321. This is a <u>provisional</u> double patenting rejection since the conflicting claims have not in fact been patented.

Art Unit: 2838

#### Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hwang discloses a power factor correction with a carrier control input voltage sensing. Kim discloses a power supply device and method with a power factor correction circuit. Choi et al. disclose a power factor correction circuit having an error signal multiplied by a current signal. Maksimovic et al. disclose a non-linear carrier controllers for high power factor rectification. Whittle disclose a power factor boost converter power supply.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adolf Berhane whose telephone number is 571-272-2077. The examiner can normally be reached on Monday- Friday 8 AM to 6 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Sherry can be reached on 571-272-2084. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Business Center (EBC) at 866-217-9197 (toll-free).
